EDUCATION

Universiti Malaya | Kuala Lumpur, Malaysia
Bachelor of Computer Science (Information System)

Expected Graduation: May 2028
CGPA: 3.71 / 4.00

- Relevant Coursework:** Data Structures & Algorithms, Computer Architecture, Machine Learning, Object-Oriented Programming, Mobile Application Development

SKILLS

Programming Languages: Java(Strong), Python, HTML5, CSS, JavaScript/TypeScript, XML, C, SQL

Developer Tools: Google Colab, Supabase, Firebase, Android Studio, Git & GitHub, Figma, Postman,

Libraries/Frameworks: Spring Boot, ReactJS, React Native, Tailwind CSS

EXPERIENCES

Machine Learning Engineer, DataHacks 2025 - Universiti Malaya

May 2025

- Fine-tuned Hugging Face models to build an AI hate speech detection tool aligned with UN SDG 10.
- Optimized the machine learning pipeline, securing **3rd Place (2nd Runner-Up)** in the competition.

Group Leader & Software Developer, UM Hackathon 2025 - Universiti Malaya

March 2025

- Led a team to prototype a hands-free, multilingual voice transcription assistant for ride-hailing drivers.
- Engineered a robust speech-to-text pipeline using OpenAI's Whisper model to transcribe noisy, real-world audio.

Frontend Developer, UM Internal Hackathon 2024 - Universiti Malaya

September 2024

- Designed a scalable ride-hailing app in **Flutter**, engineering core user flows to simulate platforms like Grab.
- Developed a responsive, cross-platform UI that earned the team an exclusive **Appreciation Award**.

PROJECTS

VoiceUnheard App, Lead Developer

October 2025 – December 2025

- Directed the development of a **React Native** app to securely document user-submitted injustice reports (UN SDG 16.10).
- Engineered the frontend architecture and integrated a **Supabase** backend for secure cloud data storage.

MealShare App, Lead Developer

September 2025 – November 2025

- Led the technical design and end-to-end development of a food-sharing mobile app in **Android Studio**.
- Engineered core **Java logic** and **responsive XML layouts** for seamless user interaction and data flow.

AI-Integrated Heritage Video Explorer, Backend Developer

September 2025 – November 2025

- Engineered backend infrastructure to securely manage long-form heritage video datasets for BWM (Badan Warisan Malaysia).
- Built an automated pipeline using **Gemini API** to transcribe and classify video content by sentiment.

Personal Portfolio Website

March 2024 – May 2024

- Developed a responsive, single-page application using **ReactJS** to effectively showcase software engineering projects and technical capabilities.
- Designed scalable UI components and optimized the application for cross-device accessibility and fast rendering speeds.
